# The Anatomy of an Omni Chiropractic Table.

## Rock Solid Frame

Omni Chiropractic Tables are built 100% in house allowing us to maintain the highest level of quality control. Each table is cut, welded and finished without any castings to produce tables of the most solid construction. Sure it would be quicker and cheaper to use pre-made castings in the manufacturing process, but by cutting and welding we provide you with, what we believe are, the strongest, most durable chiropractic tables available.

## Industrial Strength Upholstery

There are three grades of vinyl in the marketplace Consumer, Commercial, and Industrial. The consumer grade has a rub cycle of 100,000-250,000. The commercial grade has a rub cycle of 250,000 to 500,000 and finally there is the industrial standard with a rub cycle in excess of 500,000. It is only this high grade vinyl which is selected for the Omni Table range.

## Superior Support

Rather than using ordinary foam, Omni Tables incorporates a dual density system of Rebond foam for each table top. The bottom layer is a 5kg Rebond foam which is 25mm thick. On top of this we place another layer of 48mm poly foam. The rebond foam is the best material you can use for a Chiropractic table and this dual layer system offers the ultimate combination of patient comfort and support.

## Elevation Engines

No expense is spared in the construction of our motors. Our aluminium casings are cut from one solid billet of aluminium and not from welded castings like others in the marketplace. Our motors run cooler and are one of the strongest and most reliable products available.

note: applies to elevation tables only

## Sturdy Tri-Steel Column

Omni Tables offer the only triple column lift in the chiropractic industry - most other brands are only double column. With the triple column lift more of the shaft is left in the column which results in an extremely sturdy and stable working platform and a chiropractic table with a longer working life.

note: applies to elevation tables only

## Headpiece Flexibility

The headpiece of an Omni Table is an engineering work of art. It offers a wide range of adjustment including elevation, extension, rotation, side flexion and side translation in any combination simultaneously.

## 5 Reasons to Consider an Omni Chiropractic Table.

### 1 Quality

*Designed and built by a family loyal to the Chiropractic profession, who have been serving the chiropractic profession with quality products for over 30 years. Our mission is to provide chiropractors with products that are built to be unmatched in quality, versatility, adaptability and sheer strength. All of our tables have a maximum drop patient weight of 225kg. No other adjusting table in the industry comes close to this - most are rated to 115kg max.*

### 2 Saves the Chiropractor's Back

*We understand that chiropractic is all about the good of the patient, and the intelligent design of our chiropractic adjustment tables will not only provide the best chiropractic care available, but give the chiropractor added ease and comfort in their patient interactions.*

### 3 Custom Options

*Omni Tables come in 3 basic models: Stationary, Elevation and Flexion Distraction. Each of these can be customised to suit your individual needs with height options, electric elevation and elevated chest drop.*

### 4 Decorator Colours

*All Omni Tables are upholstered using the comprehensive collection of Boltaflex vinyls. These are tried-and-true fabrics that combine beauty and performance and provide the ultimate resistance to stains, abrasion, flame and mildew. Boltaflex vinyls come in a large variety of colours allowing your chiropractic table to coincide with any clinic décor.*

### 5 Piece of Mind

*All Omni Chiropractic Tables are built using only the highest quality manufacturing processes and the best quality parts and materials. This is why we are able to offer a Lifetime Structural Guarantee on all the tables in our range along with a full 2 Year warranty on the springs and a 12 month warranty on all motors. We do all this so that you can be confident that you made the right choice in years to come.*
